

COURSE SYLLABUS

COURSE TITLE:	BIOL 318 Comparative Animal Systems Physiology		
COURSE CODE:	21435	TERM:	Winter 2022
COURSE CREDITS:	3.0	DELIVERY:	Lecture & Practicum (Lab)
CLASS SECTION:	01	START DATE:	10 Jan 2022 (lectures) 19 Jan 2022 (labs)
LECTURE LOCATION:	Remotely: Zoom (through Canvas)	LAB LOCATION:	Remotely: Zoom
LECTURE TIME:	In-person: Room 265 Geology Bldg		In-person: Room 95 Murray Bldg
WEBSITE:	10:30 to 11:20 am MonWedFri via PAWS/Canvas	LAB TIME:	1:30-5:20 pm Wednesday

Land Acknowledgement

I acknowledge that many of us are living, working, learning, and paying respect to the Homeland of the Metis, and the territory of the Cree, Dene, Saulteaux, and Nakota peoples, recognized by Treaty 6, and the unrecognized Dakota and Lakota people who are also a part of this land. Let us pay our respect to the ancestors and history of this place.

Remote Learning Context

The University of Saskatchewan will start this term in a remote setting with the hope that we will be able to transition to in-person teaching and learning later in January. Your instructors have adjusted the course to accommodate to the new calendar and remote learning requirement while balancing the need to meet course learning objectives.

If you are on campus at any time, ensure you know what is required and expected of you:

One of the critical lessons learned in dealing with COVID-19 is knowing that situations can change and we must be flexible and ready to adjust our safety protocols. Instead of listing all of the relevant information in your course outline, the university has created a webpage where all up-to-date information around returning to campus is listed. You are responsible for regularly checking the health and safety guidelines Expectations and knowing what is expected of you throughout the term. <https://covid19.usask.ca/about/safety.php#>

During the remote phase of the course, lectures and labs will be web-based, delivered live via Zoom, on the regular schedule. You are encouraged to attend each of the web-based lectures in order to interact with your instructors and other students. We will post recordings of the web lectures as a backup for students who may encounter internet connectivity issues. Attendance at the laboratories are mandatory.

Course Description

An in-depth examination of cardiovascular, respiratory, osmoregulatory, digestive, and reproductive system physiology in animals. Examples are drawn from vertebrate and invertebrate models. Emphasizes endocrine and nervous coordination of cellular and whole animal body functions.

Prerequisite(s): BIOL 317 (formerly BIOL 217).

Note: Students with credit for BIOL 218 will not receive credit for this course.

Learning Outcomes

By the completion of this course, students will be expected to:

1. demonstrate an in depth understanding of physiological principles and processes associated with major animal organ systems
2. analyze and solve realistic medical, veterinary or other physiological problems and case studies
3. interpret complex scientific articles relevant to course material
4. relate new scientific knowledge to their understanding of how the animal body functions
5. explain current scientific research findings through an oral presentation
6. demonstrate effectiveness in team-work to accomplish complex tasks

Note: The University of Saskatchewan Learning Charter is intended to define aspirations about the learning experience that the University aims to provide, and the roles to be played in realizing these aspirations by students, instructors and the institution. A copy of the Learning Charter can be found at: http://www.usask.ca/learning_charter/

Course Overview

The purpose of this course is to provide you with an in-depth understanding of the physiology of major body organs and systems in animals. BIOL 318 will build upon fundamental information from BIOL 224 and BIOL 317. Lectures will incorporate examples from a variety of animals although the organ systems of mammalian groups tend to be the best studied. The course will integrate modern research findings in physiology, biochemistry, evolution and genetics with the classical understanding of animal physiology. Six afternoons of hands-on lab exercises plus three afternoons for student presentations are also included in this course. In the hands-on exercises, you will work in small groups to solve problems associated with case studies drawn from medical, veterinary or other real-world situations. The case studies are used to provide a practical illustration of some of the major lecture concepts and are coordinated with lecture material as shown in the schedule below. You will have access to the internet and electronic University Library resources during the lab period to assist in solving the cases. A one-page report summarizing your case study will be prepared as a group exercise during the lab period and submitted at the conclusion of the lab. You will also hone your scientific writing and oral communication skills through literature research assignments and a class presentation during the laboratory. Each student will be assigned three recent scientific articles to read and understand. These will be spaced-out during the term and coordinated with other lab work and lecture material as shown in the schedule below. You will be responsible for completing a one page summary of each article, and giving a 20 minute oral presentation on one of the articles.

Note that the lab periods are scheduled for 3 hrs 50 minutes per afternoon; students must make themselves available for this entire time period.

Class Schedule

Week/ Dates	Instructor Major Lecture Topics Textbook Readings*	Laboratory Activity	Student Work Due/Other Types of Assessment
Week 1 Jan 10 to Jan 14	Nature and purpose of class Circulatory System Physiology <u>Textbook</u> : Part V	<i>No lab scheduled this week</i>	Nothing due
Week 2 Jan 17 to Jan 21	Circulatory System Physiology <u>Textbook</u> : Part V	<i>Intro to Literature Research Assignment #1 (cardiac physiology)</i>	Nothing due
Week 3 Jan 24 to Jan 28	Circulatory System Physiology <u>Textbook</u> : Part V	<i>Case Study #1 (cardiac electrophysiology)</i>	Group Case #1 Report
Week 4 Jan 31 to Feb 4	Circulatory System Physiology <u>Textbook</u> : Part V	<i>Case Study #2 (cardiac pharmacology)</i>	Group Case #2 Report
Week 5 Feb 7 to Feb 11	Circulatory System Physiology Respiratory System Physiology <u>Textbook</u> : Part V	Literature Research #1 - Student Presentations Lit Research Assignment #2 (renal physiology)	Literature Research Assignment #1 Summary & Presentation
Week 6 Feb 14 to Feb 18	Respiratory System Physiology & Regulation <u>Textbook</u> : Part V	<i>Case Study #3 (respiratory physiology)</i>	Group Case #3 Report
Week 7 Feb 21 to Feb 25	Midterm Break No lectures or labs scheduled		
Week 8 Feb 28 to Mar 4	Osmoregulatory Physiology <u>Textbook</u> : Part VI	<i>Midterm Exam (90 minutes; (to end of Respiratory System Physiology)</i>	
Week 9 Mar 7 to Mar 11	Osmoregulatory Physiology & Regulation Digestive System Physiology <u>Textbook</u> : Chapter 6	<i>Case Study #4 (osmoregulatory physiology)</i>	Group Case #4 Report
Week 10 Mar 14 to Mar 18	Digestive System Physiology <u>Textbook</u> : Chapter 6	<i>Lab Period: Case Study #5a (gastrointestinal physiology)</i>	Group Case #5a
Week 11 Mar 21 to	Digestive System Physiology <u>Textbook</u> : Chapter 6	<i>Literature Research #2 - Student Presentations;</i>	Literature Research Assignment #2

Mar 25	Metabolism and Bioenergetics	<i>Intro to Literature Research Assignment #3 (endocrine physiology)</i>	Summary & Presentations
Week 12 Mar 28 to Apr 1	Metabolism and Bioenergetics Endocrine Physiology Textbook: Chapters 16 & 17	<i>Lab Period: Case Study #5b (gastrointestinal physiology)</i>	Group Case #5b Report
Week 13 Apr 4 to Apr 8	Reproductive Endocrinology & Physiology	<i>Literature Research #3 - Student Presentations (endocrine physiology)</i>	Literature Research Assignment #3 Summary & Presentations
Week 14	Reproductive Endocrinology & Physiology Course wrap-up		
	Final Exam during regular exam period (Apr 9 to 29)		

* Additional readings may be assigned as the course proceeds. These will be noted during the lectures or in the lab modules as appropriate.

Instructors:

Contact Information:

Dylan Baloun (he/him) (course lead)	room 316 CSRB Biology dylan.baloun@usask.ca	
Dr Tracy Marchant (faculty mentor)	room 120.3 CSRB wing Biology tracy.marchant@usask.ca	966-4420
Ms Sheri Fisher (lab coordinator/instructor)	room G77.3 Thorvaldson sheri.fisher@usask.ca	966-4431

Office Hours: Generally-speaking, the instructors above will be available in their offices on a drop-in basis. However, please note that all instructors have other commitments that may take them away from their office. Specific appointments can be set by email or through a phone call. Email responses to specific questions about course material are at the discretion of each instructor; information about individual policies will be provided in the lecture or laboratory by each instructor.

Instructor Profiles & Other Information: Instructor Baloun is a PhD Candidate and a Teacher Doctoral Scholar Fellow, in the Department of Biology, studying the integrated nature (i.e., physiology, ecology, evolution) of wildlife in Canada's north. Professor Marchant is a regular faculty members in the Department of Biology. Both hold advanced degrees (both: MSc, Marchant: PhD). Dr. Marchant teaches and conducts research in the general area of animal physiology. Ms Fisher also holds an advanced degree (MSc) and is responsible for coordinating and teaching in the laboratories for BIOL 318.

Required Resources

Textbooks

Hill, Wyse & Anderson. 2016. Animal Physiology 4 ed, Sinauer.

This is available from the University of Saskatchewan Bookstore:

http://www.usask.ca/consumer_services/bookstore/textbooks

Laboratory Instructions for BIOL 318 will be available as a free download from the course Canvas page.

Electronic Resources

The laboratory portion of this course will require a working knowledge of computers and various computer programs, including MS Excel, Word and Powerpoint. Computers will be used extensively to search the internet and access University Library resources and prepare reports in the laboratory. You will need to access your University computer account during the laboratory; make sure you know your university nsid and password and how to log on to your account. Further details about the lab exercises are in the Canvas lab modules.

Downloads

These will be available as appropriate through the course Canvas. The only document that you are required to download and read is the course syllabus. Powerpoint slides may be provided to you as a courtesy. You are not required to download or print these slides. While the instructors will endeavour to have the lecture Powerpoint slides posted sometime in advance of the lecture, this will not be guaranteed.

Supplementary Resources

From time to time, your instructors may make supplementary material available to you through the course Canvas. This material will not replace the lecture or lab experience and you are encouraged to attend all lectures and take your own notes.

Grading Scheme

Midterm Exam	20
Final Exam	40
Group Case Reports/Description (six X 2.5% each)	15
Literature Research Summary (three X 5% each)	15
Oral Presentation (one)	10
Total	100%

Evaluation of Student Performance

Midterm Exam

Value: 20% of final course grade

Date: Mar 2 (to be written at 2 pm during the lab period)

Length: 90 minutes

Format: a mix of multiple choice questions and those requiring a written answer.

Description: Will include lecture material to the end of Respiratory Physiology. Calculators allowed. No phones, laptops, tablets or other materials allowed.

Final Exam

Value: 40% of final grade

Date: Consult the Final Exam Schedule when it is released.

Length: 3 hours

Format: a mix of multiple choice questions and those requiring a written answer.

Description: The exam is comprehensive in that it will cover all lecture material. However, material delivered since the midterm exam will be emphasized. Calculators allowed. No phones, laptops, tablets or other material allowed. Students should plan to be in Saskatoon during the final exam period (Apr 9 to 29) as the BIOL 318 final exam could be scheduled on any day during this period.

Group Case Reports:

Value: 15% of final grade

Due Date: See Course Schedule for exact dates

Format: Each group of students will prepare five one-page reports about the case they studied in the lab. Each report is to be submitted electronically prior to the end of the lab period when the case was studied. For Case #5a, each group will prepare a Powerpoint case description for their fellow students to analyze in the subsequent laboratory period

Description: Comprehensive information about the format and style to be used for these reports is contained in the lab module on Canvas and will be explained in detail during the orientation lab period. Each report will consist of one page of writing plus a separate page for the references used to prepare the case report. Students are required to know and understand what constitutes plagiarism and the University's Regulations on Academic Student Misconduct

(see below). Five cases will be studied by each group and each case report will be worth 2.5% of the final grade. The Powerpoint case description in Lab 5a is to be prepared following the format of the other case descriptions used in the course and will consist of 5 to 7 Powerpoint slides (worth 2.5%). The work from Labs 5a and 5b will be assessed by the instructors and other student involved with the cases.

Publication of the Case Report: Each group case report will be posted on the course Canvas so that other students can read and learn from the case. The grade assigned to the report will remain confidential (i.e., will not be posted).

Literature Research Summaries:

Value: 15% of final grade

Due Date: See Course Schedule for exact dates

Format: Each student will independently prepare a one-page summary of the research article they were assigned to study in the lab. Each summary is to be submitted electronically to their laboratory demonstrator prior to the start of the lab period when presentations are given on each research topic.

Description: Comprehensive information about the format and style to be used for these summaries is contained in the lab module on Canvas and will be explained in detail during the lab in week two of the course. Each summary will consist of one page of writing plus a separate page for the references used to prepare the summary. Students are required to know and understand what constitutes plagiarism and the University's Regulations on Academic Student Misconduct (see below). Three articles will be studied by each student and each summary will be worth 5% of the final grade.

Publication of the Literature Research Summary: Each summary will be posted on the course Canvas so that other students can read and learn from the literature research assignment. The grade assigned to the summary will remain confidential (i.e., will not be posted).

Oral Lab Presentation:

Value: 10% of final grade

Date: See Course Schedule; exact dates are assigned randomly to each student.

Format: 20 minute Powerpoint presentation

Description: Each student will be required to give one presentation detailing the article they studied for a Literature Research Assignment (5%). Presentation topics are assigned randomly in the lab orientation period. Students not presenting will be assigned to ask questions to the student presenters (5%).

Publication of the Lab Presentation: Each Powerpoint will be posted on the course Canvas so that other students can read and learn from the presentation. The grade assigned to the presentation will remain confidential (i.e., will not be posted).

Submitting Assignments/Feedback to Students

Students will work collaboratively with other group members to prepare a one-page summary of each case study assigned to them. The case reports will be graded by the instructors who will also watch for plagiarism. Reports will be graded and returned on a schedule such that students will have regular feedback about their work after they have submitted the first two reports. Each student must independently write a one-page summary for each of the three research articles assigned to them. These will be graded by the teaching assistant who may consult with Instructor Baloun and/or Dr Marchant. Grades will be assigned based on the quality of the writing including formatting, grammar, spelling, scientific writing and other aspects of the report. Additional information about the format of the summaries is contained in a lab module on Canvas; students must read this carefully. The oral presentation will be evaluated by

the instructors and other students in the lab section. A rubric and weighting scheme for assessing the presentation will be posted on Canvas. Presenters will be provided with written feedback about their performance. Marks from the midterm exam will be available approximately one week after the exam in advance of the last day to withdraw deadline.

Lab Attendance Expectations

Students are expected to attend, and be on time, for all scheduled labs. A student who arrives late may be penalized by a 10% deduction on the learning assessment for that lab period, and in serious cases, may even be excluded from the laboratory session by the instructor. In that case, the student will receive a grade of zero for that lab activity.

It is impossible to schedule make-up labs for this course. Students who miss a lab period are assigned a mark of zero for the work that was to be completed during the missed lab period. Students are required to contact the course coordinator prior to the end of the lab period if they are too ill to attend the lab or are facing extenuating personal circumstances that requires them to be away from the University. When a lab is missed due to illness or personal circumstances, the marks associated with the missed lab exercise will be distributed to remaining course components as determined by the instructor. Note that each situation will be judged and determined separately. Similar procedures will be followed if a student is going to miss giving their scheduled lab presentation.

Midterm and Final Examination Scheduling

The midterm must be written on the day scheduled. Students are required to contact Dylan Baloun or Professor Marchant prior to the start of the midterm exam if they are too ill to attend the lab or are facing extenuating personal circumstances that requires them to be away from the University. Arrangements will be made to write the midterm exam at another time. The University Administration schedules final course examinations between April 7 to 28. Students should therefore avoid making prior travel, employment, or other commitments for this period. Alternate times to write the final course examination cannot be accommodated by the instructors.

Students who miss the final exam must contact the College and apply for a deferred final exam. Deferred exams may utilize a different format than the regular exam, at the sole discretion of the instructors.

Students are encouraged to review all examination policies and procedures:

<http://students.usask.ca/academics/exams.php>

Students planning on registering with the office for Access and Equity Services for Students (AES) must do so in accordance with AES procedures and deadlines (see information regarding Student Supports below).

Recording of the Course

Students are not allowed to record any aspect of this course, except with the permission of the instructor or as provided for by arrangements with AES. Any recording made under AES provisions is to only be used for the personal learning of the student who made the recording.

Copyright

Course materials are provided to students based on their registration in a class. Any material created by course instructors is the intellectual property of the instructors. This includes exams, PowerPoint/PDF slides and other course notes. Additionally, other copyright-protected materials

created by textbook publishers and authors may be provided to students based on license terms and educational exceptions in the Canadian Copyright Act (see <http://laws-lois.justice.gc.ca/eng/acts/C-42/index.html>).

Before copying or distributing others' copyright-protected materials, students need to ensure that their use of the materials is covered under the University's Fair Dealing Copyright Guidelines available at <http://www.usask.ca/copyright/basics/copyright-policy/fair-dealing-guidelines/index.php>. For example, posting others' copyright-protected materials on the internet is not covered under the University's Fair Dealing Copyright Guidelines; doing so requires permission from the copyright holder. For more information about copyright, please visit <http://www.usask.ca/copyright/students/rights/index.php> or contact the University's Copyright Coordinator at copyright.coordinator@usask.ca.

Students should be aware that a violation of the university's copyright policies could be an instance of non-academic misconduct. For example, the practice of uploading or posting copyright-protected materials to course-sharing websites, depositories, or "drop boxes", without the permission of the copyright holder, could result in a charge of non-academic misconduct under the university's "Standard of Student Conduct in Non-Academic Matters" (see Student Conduct section below).

Student Feedback

The Department of Biology or the course instructors may survey students regarding the course. This is generally done through an in-class assessment near the end of the course.

University of Saskatchewan Grading System

The University has established a grading system to be used in all of its courses. Information on literal descriptors for grading at the University of Saskatchewan (reproduced below) can be found at: <http://students.usask.ca/academics/grading/grading-system.php>

Exceptional (90-100) A superior performance with consistent evidence of

- a comprehensive, incisive grasp of the subject matter;
- an ability to make insightful critical evaluation of the material given;
- an exceptional capacity for original, creative and/or logical thinking;
- an excellent ability to organize, to analyze, to synthesize, to integrate ideas, and to express thoughts fluently.

Excellent (80-90) An excellent performance with strong evidence of

- a comprehensive grasp of the subject matter;
- an ability to make sound critical evaluation of the material given;
- a very good capacity for original, creative and/or logical thinking;
- an excellent ability to organize, to analyze, to synthesize, to integrate ideas, and to express thoughts fluently.

Good (70-79) A good performance with evidence of

- a substantial knowledge of the subject matter;
- a good understanding of the relevant issues and a good familiarity with the relevant literature and techniques;
- some capacity for original, creative and/or logical thinking;
- a good ability to organize, to analyze and to examine the subject material in a critical and constructive manner.

Satisfactory (60-69) A generally satisfactory and intellectually adequate performance with evidence of

- an acceptable basic grasp of the subject material;
- a fair understanding of the relevant issues;
- a general familiarity with the relevant literature and techniques;

- an ability to develop solutions to moderately difficult problems related to the subject material;
- a moderate ability to examine the material in a critical and analytical manner.

Minimal Pass (50-59) A barely acceptable performance with evidence of

- a familiarity with the subject material;
- some evidence that analytical skills have been developed;
- some understanding of relevant issues;
- some familiarity with the relevant literature and techniques;
- attempts to solve moderately difficult problems related to the subject material and to examine the material in a critical and analytical manner which are only partially successful.

Failure <50 An unacceptable performance

For information regarding appeals of final grades or other academic matters, please visit the Student Conduct and Appeals section of the University Secretary's webpages:

<https://secretariat.usask.ca/student-conduct-appeals/appeals-in-academic-matters.php>

Student Conduct

Integrity Defined

The University of Saskatchewan is committed to the highest standards of academic integrity and honesty. Students are expected to be familiar with these standards regarding academic honesty and to uphold the policies of the University in this respect. Students are particularly urged to familiarize themselves with the provisions of the Student Conduct & Appeals section of the University Secretary webpages (see below) and avoid any behavior that could potentially result in suspicions of cheating, plagiarism, misrepresentation of facts and/or participation in an offence. Academic dishonesty is a serious offence and can result in suspension or expulsion from the University.

More information on what academic integrity means for students is found in the Academic Integrity webpages hosted by the University of Saskatchewan Library:

<https://library.usask.ca/academic-integrity.php>

Policies on Academic Dishonesty, Academic Appeals and Course Delivery

Students are expected to undertake all aspects of their academic work in an ethical manner. Students are expected to submit their own individual work for academic credit, properly cite the work of others, and to follow all rules for examinations. Academic misconduct, plagiarism, and cheating will not be tolerated. Students are responsible for understanding the university's policies on academic integrity and academic misconduct. If any form of academic misconduct is discovered, appropriate disciplinary action will be taken.

Information about expectations and policies about student conduct at the University of Saskatchewan can be found at The Office of the University Secretary webpage. This webpage contains links to several important documents including the Student Discipline Policy, Student Academic Misconduct Regulations, Standard of Student Conduct in Non-Academic Matters, and Procedures for Student Appeals in Academic Matters (see weblinks below).

About Student Conduct:

<https://secretariat.usask.ca/student-conduct-appeals/index.php>

Appeals in Academic Matters:

<https://secretariat.usask.ca/student-conduct-appeals/appeals-in-academic-matters.php>

Academic Misconduct:

<https://secretariat.usask.ca/student-conduct-appeals/academic-misconduct.php>

Non-Academic Misconduct:

<https://secretariat.usask.ca/student-conduct-appeals/non-academic-misconduct.php>

A summary of University of Saskatchewan policies relating to academic courses is provided in the document: Academic Courses Policy on Class Delivery, Examinations, and Assessment of Student Learning <https://policies.usask.ca/policies/academic-affairs/academic-courses.php>

Safety:

Students are expected to work in a safe and responsible manner, to follow all safety instructions, and use any specified personal protective equipment as instructed. Students failing to behave in a safe manner will be asked to leave the laboratory.

Student Supports

Support Services for Arts & Science Students

- Arts & Science Undergraduate Student Office (Arts 265)
- The Trish Monture Centre for Student Success (Arts 250)
<https://artsandscience.usask.ca/undergraduate/advising/>
- Student Wellness Centre (3rd & 4th Floors, Place Riel):
<https://students.usask.ca/health/>
- Financial Services: <https://students.usask.ca/money/>

Student Learning Services

Student Learning Services (SLS) offers assistance to U of S undergrad and graduate students. For information on specific services, please see the SLS web site:

<https://library.usask.ca/studentlearning/>

Teaching, Learning and Student Experience

The Teaching, Learning and Student Experience Unit (TLSE) focuses on providing developmental and support services and programs to students and the university community. For more information, see <https://teaching.usask.ca/about/people/vice-provost-teaching-learning-and-student-experience.php>

Examinations through Access and Equity Services (AES)

Students who have disabilities (learning, medical, physical, or mental health) are strongly encouraged to register with AES if they have not already done so. Students who suspect they may have disabilities should contact AES for advice and referrals. In order to access AES programs and supports, students must follow AES policy and procedures. For more information, check www.students.usask.ca/aes, or contact AES at 306-966-7273 or aes@usask.ca. They are located in Rm. E1, Administrative Building.

Students registered with AES may request alternative arrangements for mid-term and final examinations.

Students must arrange such accommodations through AES by the stated deadlines. Instructors shall provide the examinations for students who are being accommodated by the deadlines established by AES.
