

BIOL 479 - Projects in Vertebrate Evolution and Organismal Biology

Dr. Marchant is willing to supervise BIOL 479 Literature Research projects on a wide range of topics dealing with vertebrate organismal biology, including physiology and the evolution of vertebrates and the vertebrate body. Projects in either the Fall or Winter term can be accommodated. If you have an idea for a literature research project in one of these areas, contact Dr. Marchant directly at tracy.marchant@usask.ca (or drop by room 120.3 CSRB Biology Department).
