Make the most of your summer with a job that really pays.

Qualified undergraduate students in chemistry or a related discipline are encouraged to gain practical experience in science by joining an active research program for the summer. The department offers competitive salaries.

You can apply for an Alan C. Nixon or JWT Spinks Summer Research Award by contacting a Chemistry faculty member to sponsor your application. Applications consist of a brief CV and an application form describing the research proposal, completed by the faculty member. The deadline for applications is February 1, 2022.

The Department of Chemistry offers a broad array of federally funded research programs in molecular sciences. Research for students interested in any sub-discipline of chemistry is available. Check out our web site http://www.artsandscience.usask.ca/chemistry for more information on these research fields:

- Analytical
- Biological
- Bioorganic
- Environmental
- Inorganic
- Materials
- Medicinal
- Organic
- Photovoltaics
- Physical
- Surface
- Theoretical

Eligibility:

- Full-time B.Sc. or B.E. student
- Completed at least 9 cu’s of Chemistry
- Not graduating in 2022

Terms:

- Approximate Total Salary: ~ $6,500 to $8,800 (depending on year in program)
- Work week: 35 hours
- Duration: Any 16 week period between May 1 and August 31, 2022

Procedure to Apply for an Alan C. Nixon or JWT Spinks Summer Research Award

in the Department of Chemistry

1. Select a Chemistry supervisor in an area of interest (check the Department of Chemistry website for a listing). Contact the faculty member to discuss the possibility of doing a summer research project and provide the faculty member with a copy of your unofficial advising transcript.

2. When a supervisor has been confirmed, they will need to fill out their part of the application form, outlining the research project.

3. Submit your CV/Resume to the Department of Chemistry office (Thorvaldson 165 or erin.wasylow@usask.ca). The deadline is February 1, 2022.

Note that we do not require official transcripts for these awards. Selection is expected to be completed shortly after the deadline.

Unsuccessful NSERC USRA applications will automatically be considered for these awards.

If you have any questions, please contact Erin Wasylow, Office Coordinator, Department of Chemistry (erin.wasylow@usask.ca or 966-4655).
