Make the most of your summer with a job that really pays.

Qualified undergraduate students in chemistry or a related discipline are encouraged to gain practical experience in science by joining an active research program for the summer. The department offers competitive salaries.

You can apply for a summer research award by contacting a Chemistry faculty member to sponsor your application. There are three awards available: (1) Alan C. Nixon, (2) John and Mary Spinks, or (3) Department of Chemistry / Saskatchewan Structural Sciences Centre. One application is sufficient to be considered for all three awards, and will consist of a brief CV and an application form describing the research proposal, completed by the faculty member. The deadline for applications is January 17, 2023.

The Department of Chemistry offers a broad array of federally funded research programs in molecular sciences. Research for students interested in any sub-discipline of chemistry is available. Check out our web site https://artsandscience.usask.ca/chemistry/research.php for more information on these research fields:

- Analytical
- Biological
- Bioorganic
- Environmental
- Inorganic
- Materials
- Medicinal
- Organic
- Photovoltaics
- Physical
- Surface
- Theoretical

Eligibility:
- Full-time B.Sc. or B.E. student
- Completed at least 9 cu’s of Chemistry

Terms:
- Approximate Total Salary: ~ $6,500 to $8,800 (depending on year in program)
- Work week: 35 hours
- Duration: Any 16 week period between May 1 and August 31, 2023

Procedure to Apply for an Alan C. Nixon, John and Mary Spinks, or Dept of Chemistry/SSSC Summer Research Award in the Department of Chemistry

1. Select a Chemistry supervisor in an area of interest (https://artsandscience.usask.ca/chemistry/undergraduates/summer-research.php). Contact the faculty member to discuss the possibility of doing a summer research project and provide the faculty member with a copy of your unofficial advising transcript (official transcripts are not required).

2. When a supervisor has been confirmed, they will need to fill out their part of the application form, outlining the research project.

3. Submit your CV/resume to Erin Wasylow, Department of Chemistry (erin.wasylow@usask.ca or Thorvaldson 165).

Note: The deadline for applications is January 17, 2023. Selection is expected to be completed shortly after results of the NSERC USRA competition are announced. Unsuccessful NSERC USRA applications will automatically be considered for these awards.
