Economics Internship Program

Do you want to graduate with an advantage? Then the expanding Internship Program in Economics is the right program for you.

Academic Information:

The Economics Internship Program is an opportunity for senior Arts and Science students to get valuable job experience, as well as academic credit for “learning by doing.” If selected, you will perform 8 to 10 hours per week of unpaid work for a host employer and complete a project-related academic component, such as a paper or presentation.

Based on evaluation of your job performance and academic work, course credit for Econ 387.3 or 385.6 —the course for which you have registered—will be granted toward your degree. Tuition fees apply and you must meet the prerequisites for the 385.6 or 387.3 course under which you are credited.

The Benefits:

Imagine working on fascinating projects such as these:

- an investment analysis in Saskatchewan’s oil and gas industry
- the impact of taxation and royalty rates on the natural resource sector in Western Canada
- an analysis of the workings of the international carbon emission trading market (Cap and Trade analysis)

Imagine how working on projects like these will look on your resume!

Imagine all the additional benefits and advantages the **Economics Internship** can bring to your career:

- acquiring and enhancing your human resource and problem solving skills
- enhancing and strengthening your applied economic and quantitative research skills

Economics Internship Program

- the opportunity to work and network with host-organizations from world class corporations like Cameco and organizations like the Greater Saskatoon Chamber of Commerce
- Getting the opportunity to receive a possible job offer after the internship

What Former Students Are Saying:

- This internship not only allowed me to achieve what I was hoping to take away from it, but so much more. It was an absolute privilege to be a part of this program and I truly believe it was my competitive advantage in landing a great job right out of University.
- The Economics Internship program enables students to develop not only academically but as well in terms of professional development through the diverse interaction amongst executives, political figures, and diverse organizational structures.
- The University of Saskatchewan economics internship strives to deliver high calibre candidates who promise a beneficial project contribution to the host firm/organization. This platform presents the ideal occasion to translate curriculum into practice. I remain indebted for the inception of the program and the university’s forward-thinking which has substantially favoured my progress.
- This internship provided me with the applicable skills, contacts and confidence it takes to grow and advance my career within Saskatoon’s business community.

Applications are accepted on an ongoing basis. Apply early to avoid disappointment.
