

# SEMINAR NOTICE

*Department of Physics and Engineering Physics  
University of Saskatchewan*

---

---

**SPEAKER:** Brian Pitzel, Braden Stang & Tarah Teixeira

**TOPIC:** CaNoRock Program

**DATE:** Tuesday November 22nd

**TIME:** 3:30-4:30 p.m.

**PLACE:** *Physics 103*

**Abstract:**

The CaNoRock program is a partnership between the universities of Oslo, Tromsø, Alberta, Calgary and Saskatchewan. It consists of a week-long field course held at Andøya Space in Andenes, Norway. During the course, students assemble and test scientific sensors and learn about launching sounding rockets/weather balloons. The course culminates with the launch of a student sounding rocket containing the instruments assembled by the students. The three of us went on the CaNoRock course in early October this year, and this seminar will discuss our experiences on the course and the achieved outcomes.
