

SEMINAR NOTICE

*Department of Physics and Engineering Physics
University of Saskatchewan*

SPEAKER: Jeff Lindsay, Safety Consultant
Wellness & Safety Resources

TOPIC: *Lab Safety Certification*

DATE: September 8, 2015

TIME: 3:30-4:30 p.m.

PLACE: Physics 103

ABSTRACT:

Saskatchewan Government legislated that all supervisory personnel must receive a certificate to permit them to perform supervisory roles. Supervisors include: graduate students, teaching assistants, lab demonstrators, faculty and staff.

Any employee given authority to direct the activities of other employees is expected to know the job, understand how to control the hazards and supervise effectively. This presentation will provide everyone with some tools to help them integrate and manage health, safety and environment business into their planning, operations and processes. Furthermore, individuals will learn the knowledge and skills to take personal ownership of their health and safety and of persons they are responsible for. Please attend and make sure your colleagues attend as well.

Coffee and Cookies will be served in the Physics lounge at 3:00 p.m. for those attending the seminar.
