

INTERDISCIPLINARY PROGRAMS 2015-2016

Updated: August 5, 2015

An Interdisciplinary Program is an academic program which permits students to study beyond the boundaries of traditional disciplines or disciplinary programs, to explore in depth relationships among certain disciplines and to integrate the knowledge gained into a central theme. The College offers interdisciplinary programs which require students to take a variety of prescribed and elective courses from several disciplines. Each program is run by an Administrative Committee. Students interested in an interdisciplinary program should contact the Administrative Committee Chair for more information.

For the most current program requirements refer to the online *Course and Program Catalogue* at <http://www.usask.ca/programs/>
