

Why pursue a Bachelor of Arts?

The College of Arts and Science at the University of Saskatchewan actively prepares students who study the social sciences and the humanities to acquire flexible, adaptable and enduring skills that employers are looking for—skills like writing and communication, qualitative research, critical thinking, empathy, creativity, time management, independence and initiative.

My ultimate goal of teaching would be to see students emerge and break out of this mould of polarization—to think critically about the problems we face.

—Professor Martin Gaal

EXPLORE THE ARTS AND SCIENCE ADVANTAGE

The College of Arts and Science is the only college of its kind in Western Canada, with the arts and the sciences studied in one collegial environment. Arts and Science students explore courses from the sciences, the social sciences, the humanities and the fine arts. This well-rounded experience is precisely what sets our students apart. Not only will you have a wide range of courses and programs to choose from, as a student in the College of Arts and Science you will become skilled in complex decision making, critical thinking and creative problem solving.

Our students, researchers, scholars and artists regularly work together, across disciplinary boundaries, to address today's most pressing issues. As part of our community you will gain first-hand experience in this process through internships, undergraduate research and community-engaged learning opportunities. Once you graduate from the college and become one of our more than 50,000 alumni around the world, we know that you too will be the idea-maker or the problem solver that the world needs.

I've learned how to examine an issue critically—how to look at it from different perspectives.

—Brenna Triffo,
Alumna BA Honours

The value of a BA to me would be the ability to find yourself. It's not just about learning new things, it's also about identifying yourself in the things you learn.

—Banjo Olaleye,
Alumnus MA

The humanities focus on the critical, historical and cultural aspects of human existence.

Humanities majors include:

- Classical, Medieval and Renaissance Studies
- English
- French
- History
- Modern Languages
- Philosophy
- Religion and Culture
