

Why pursue a degree in the fine or performing arts?

The College of Arts and Science at the University of Saskatchewan actively prepares students who study the arts to acquire flexible, adaptable and enduring skills that employers are looking for: performance and public speaking, curatorial and teaching skills, spatial reasoning, time management, creativity, independence and initiative.

EXPLORE THE ARTS AND SCIENCE ADVANTAGE

The College of Arts and Science is the only college of its kind in Western Canada, with the arts and the sciences studied in one collegial environment. Arts and Science students explore courses from the sciences, the social sciences, the humanities and the fine arts. This well-rounded experience is precisely what sets our students apart. Not only will you have a wide range of courses and programs to choose from, as a student in the College of Arts and Science you will become skilled in complex decision making, critical thinking and creative problem solving.

Our students, researchers, scholars and artists regularly work together, across disciplinary boundaries, to address today's most pressing issues. As part of our community you will gain first-hand experience in this process through internships, undergraduate research and community-engaged learning opportunities. Once you graduate from the college and become one of our more than 50,000 alumni around the world, we know that you too will be the idea-maker or the problem solver that the world needs.
